Trading in financial instruments involves a high level of risk and may not be suitable for all investors. The high degree of leverage can work both to your advantage and disadvantage. Before deciding to invest in financial instruments, you should carefully consider your investment objectives, level of experience, and risk appetite. There is a possibility that you could sustain a loss of some or all of your initial investment; therefore, you should not invest money you cannot afford to lose. You should be aware of all the risks associated with trading and consult an independent financial advisor if you have any doubts.
